B. SCIENTIFIC PROGRAMME

DAY 1: 21 JUNE 2022

Summary of Scientific Programme

- 1 Keynote Lecture
- 4 Invited Lectures
- 4 Symposiums
- 5 presenters in Young Researchers' Symposium
- 6 Free Paper Presentations
- 122 posters (7 videos uploaded)

Keynote Lecture

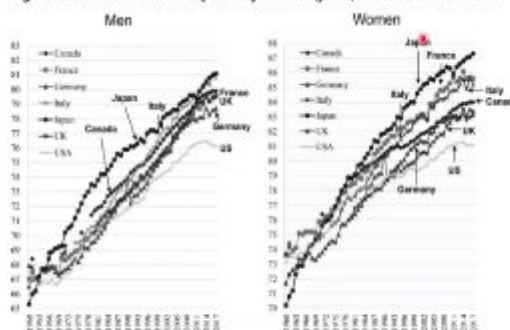

Nutrition interventions to combat NCDs and COVID-19 health threats – Experiences in Japan

Chairperson:
Dr Tee E Siong
President, Nutrition Society of Malaysia

Speaker:
Prof Dr Hisanori Kato
University of Tokyo, Japan

Fig. 1: Annual trends of life expectancy at birth (years) in selected countries.

The figure was prepared by the author using data from "OECD Health Statistics 2019".

Relationship between chronotype and chrononutrition profile with weight status of school children during COVID-19 pandemic
Vera Lynn Lam Yen, UCSI University

Introduction: The study aimed to explore the relationship between chronotype and chrononutrition profile with weight status of school children during COVID-19 pandemic.

Objectives: The study aimed to explore the relationship between chronotype and chrononutrition profile with weight status of school children during COVID-19 pandemic.

Methodology: The study was conducted using a cross-sectional design. Data were collected from school children during the COVID-19 pandemic.

Results & Discussion: The study found that there was a significant relationship between chronotype and chrononutrition profile with weight status of school children during COVID-19 pandemic.

Conclusion: The study concluded that there was a significant relationship between chronotype and chrononutrition profile with weight status of school children during COVID-19 pandemic.

eTayBus Study Malaysia: Development and Evaluation of Digital Nutrition Education Materials for Preschool Teachers
Woo Pik Xuan, Universiti Kebangsaan Malaysia

Introduction: The study aimed to develop and evaluate digital nutrition education materials for preschool teachers.

Objectives: The study aimed to develop and evaluate digital nutrition education materials for preschool teachers.

Methodology: The study was conducted using a mixed-methods design. Data were collected from preschool teachers and children.

Results & Discussion: The study found that the digital nutrition education materials were effective in improving preschool teachers' knowledge and skills.

Conclusion: The study concluded that the digital nutrition education materials were effective in improving preschool teachers' knowledge and skills.

27 APRIL 2022 Registration & Abstract Submission Open	22 MAY 2022 Abstract Submission Closed
21 - 22 JUNE 2022 Conference Day	23 June 2022 Post-Conference Events

— ABOUT THE CONFERENCE —

The COVID-19 pandemic over the past 2 years has changed the everyday lives of people around the world, including Malaysia, causing unprecedented challenges to our food, public health, food systems and the work environment. An ideal time of outbreak is even more important to maintain a healthy lifestyle as the pandemic has, at the same time, revealed the importance of strong immune systems to fight against the virus. Optimal nutrition is the key to achieve and maintain good health and a resilient immune system.

However, the pandemic has imposed a new set of challenges for the population, mainly in the nutrition part due to the impact of COVID-19 on the global food supply chain and food systems, which has led to food insecurity. The threat of food insecurity among the vulnerable groups could have been further exacerbated by the pandemic. Besides, elderly people could have also recovered, driven by stress, fear and anxiety experienced during the pandemic. At the same time, the country is still struggling with the high prevalence of non-communicable diseases (NCDs), in which university diets and the resulting malnutrition are major concern, affecting with response of the population.

— KEY THEMES —

Tentative Plenary Lectures / Symposium Topics

- Malnutrition and malnutrition
- Nutritional concerns of vulnerable groups
- Learnings from malnutrition and others
- Physical and mental health and nutrition

Important Dates

Conference: **21-22 June 2022**

Registration & Abstract submission: **27 April 2022**

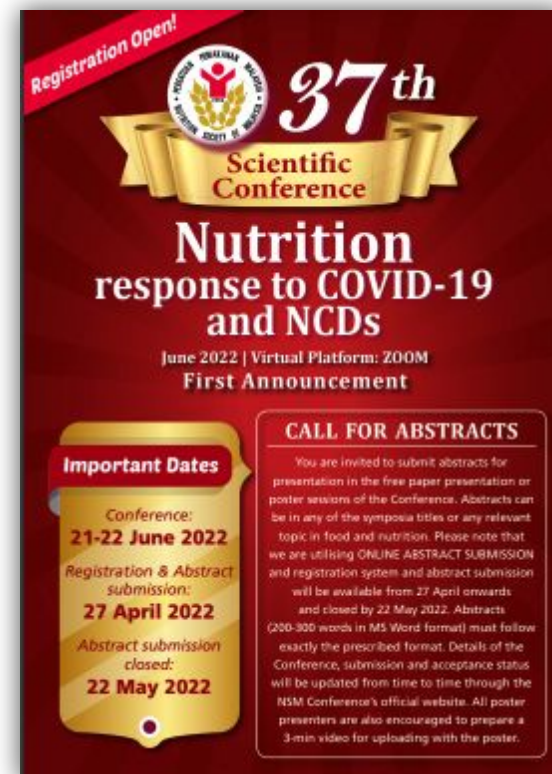

Abstract submission closed: **22 May 2022**

CALL FOR ABSTRACTS

You are invited to submit abstracts for presentation in the free paper presentation or poster sessions of the Conference. Abstracts can be in any of the symposia titles or any relevant topic in food and nutrition. Please note that we are utilising ONLINE ABSTRACT SUBMISSION and registration system and abstract submission will be available from 27 April onwards and closed by 22 May 2022. Abstracts (200-300 words in MS Word format) must follow exactly the prescribed format. Details of the Conference, submission and acceptance status will be updated from time to time through the NSM Conference's official website. All poster presenters are also encouraged to prepare a 3-min video for uploading with the poster.

Virtual Exhibition

Major sponsor booth: Herbalife Nutrition

Notable experts

Excellence in science

Our notable experts in nutrition, science and health are actively involved in the development and testing of all Herbalife Nutrition products, ensuring they are of the highest quality. They help educate and train distributors around the world, providing them with tools to help them inspire others to live a healthy, active lifestyle. They are also members of various research and professional societies and exhibit groups worldwide.

1 The Herbalife Nutrition affiliate with the highest sales and lowest customer acquisition cost in the United States in 2021.

About Herbalife Nutrition

Since 1980, Herbalife Nutrition have been on a mission to improve nutritional habits around the world with great-tasting, high quality, science-backed nutrition products that help people get the right balance of healthy nutrition.

Operating in over 90 countries, we are a strong advocate of healthy, active lifestyle. We pride ourselves as being the #1 in the world for meal replacement and protein supplements combined¹, and also the #1 in the world in weight management and wellbeing² – motivating us to provide more nutrition solutions for our consumers.

Our signature protein shake product is the Herbalife Nutrition Formula 1 Nutritious Mixed Soy Protein Drink. 1.9 million of these protein shakes are consumed every day in Asia Pacific³.

Awareness on obesity may be widespread, however, many still don't have access to the knowledge they need in order to live healthier lives. We believe in imparting and sharing the right knowledge in nutrition and how our bodies work, allowing one to make smarter eating choices.

Some of the initiatives we are involved in is the STAR Program, a three-month program to educate our Casa Herbalife Nutrition children from 3 different homes here in Malaysia on positive eating and lifestyle habits. We also conduct Asia Pacific-wide consumer surveys on various nutrition topics to raise awareness on the role of balanced nutrition, and collaborate with Nutrition Society of Malaysia on public nutrition education and sharing of nutrition insights and knowledge from our experts with the Malaysian public.

About Kerry

Kerry - Inspiring Food. Nourishing Life.

Kerry is the world's leading basic and nutrition company for the food, beverage and pharmaceutical industries. Every day we partner with customers to create healthier, better and more sustainable products that are consumed by billions of people across the world.

Our customers include the largest consumer goods companies, foodservice operators, food manufacturers and pharmaceutical companies in the world, as well as some of the fastest growing challengers. Whether for reducing food waste and saving cost or developing cleaner labels and plant-based products, Kerry has expertise to do it.

We inspire food and nourish life through the passion, commitment and work of our global team of expert food scientists, chefs, baristas, brewers, microbiologists, doctors and nutritionists. We know that success requires the ability to stay ahead of ever-changing consumer demand.

Kerry's heritage, knowledge and expertise enable us to deliver better food, health and wellbeing globally. We bring a deep knowledge of culture, life stages and related multi-faceted needs together with our expertise in the multi-dimensional science of taste. We make products people enjoy and feel better about consuming.

Virtual Exhibition / FrieslandCampina Institute

About FrieslandCampina Institute

The FrieslandCampina Institute provides nutrition and health professionals with information about dairy nutrition and health following scientific developments.

Dairy plays an important role in worldwide nutrient security. We believe that disseminating more science-based information on the role of dairy in our diets, will improve the nutritional status of people worldwide. How? Through stimulating scientific debates and sharing knowledge on dairy nutrition and health, FrieslandCampina Institute actively engages with governments, NGOs, institutes, scientists and nutrition & health professionals all over the world.

What we do? FrieslandCampina Institute provides nutrition and health professionals scientific information, accredited education programs, round table debates on scientific topics and practical tools on a wide variety of nutrition and health topics, ranging from general health in all stages of life to the nutritional composition of milk and dairy products.

"The FrieslandCampina Institute stimulates the exchange of knowledge with the aim of better nutrition for all"

Virtual Exhibition

Co-sponsor booth: Harvest Gourmet by Nestlé

WELCOME TO THE NESTLÉ WORLD OF PLANT-BASED

**GOOD FOR YOU
GOOD FOR THE PLANET**

Harvest Gourmet

Virtual Exhibition / Harvest Gourmet by Nestlé

About Harvest Gourmet By Nestlé
Meet the future of plant-based food here with Harvest Gourmet and Nestlé Dairy Free.

With a growing appetite for plant-based foods, more and more people are looking for healthier food options that are also better for the planet. A plant-based diet is based on foods that come from plants with few or no ingredients that come from animals. This includes vegetables, fruits, grains, legumes, nuts, seeds and tofu.

At HARVEST GOURMET, we work closely with our partners to create food that is good for you and good for the planet. We are committed to creating plant-based food that is not only for a healthier diet but a healthier planet for future generations. We want to be an integral part of your journey towards a healthier and more sustainable future. Harvest Gourmet is a leading plant-based food brand. Harvest Gourmet is a leading plant-based food brand. Harvest Gourmet is a leading plant-based food brand.

In addition, two of Nestlé's most loved beverage brands have launched the dairy-free line. The MILK and NESCAFÉ Dairy Free Drinks are a perfect choice for plant-based or dairy-free options of their two essential drinks. RASBERRIES, the Nestlé Dairy Free Drink is a new milk with plant-based ingredients and protein sources such as almond, soy and pea. Dairy-free, they are also low in fat.

Together, we support Malaysia on this plant-based food journey towards a more sustainable, healthy future.

Virtual Exhibition / Malaysian Palm Oil Board

About Malaysian Palm Oil Board

The Malaysian Palm Oil Board (MPOB) is the premier government agency entrusted to serve the country's oil palm industry. Its main role is to promote and develop national objectives, policies and priorities for the wellbeing of the Malaysian oil palm industry.

It was incorporated by an Act of Parliament (Act 582) and established on 1 May 2010, taking over through a merger, the functions of the Palm Oil Research Institute of Malaysia (PORIM) and the Palm Oil Registration and Licensing Authority (PORLA).

Each of these respective organisations has been involved in the oil palm industry for more than 20 years and it is to render more effective services as well as to give greater national and international focus to the industry that MPOB was instituted.

MPOB holds a vision of becoming the premier Nobel Laureate - producing research and development institution, providing leadership and impetus for the development of a highly diversified, value-added, globally competitive and sustainable oil palm industry.

Its mission is to enhance the well-being of the Malaysian oil palm industry through research, development and excellent services.

About Yakult Malaysia

Yakult (Malaysia) Sdn. Bhd. was established in 2004 as a fully owned subsidiary of Yakult Honsha Co., Ltd.

The first ever bottle of Yakult cultured milk drink was created by Dr Shirota in Japan in 1935. In Malaysia, cultured milk drink Yakult Ace was first introduced in 2004. This was followed by the launching of its lower sugar version cultured milk, Yakult Ace Light in 2016.

Both Yakult Ace and Yakult Ace Light are high quality probiotic drinks that contain over 30 billion of live Shirota strain bacteria in every 80ml bottle. In Malaysia, Shirota strain is recognized as a probiotic bacteria by the Ministry of Health under the Food Regulations. This Shirota strain is among the strongest probiotic bacteria that is able to resist gastric juice to reach the intestines alive.

Yakult Ace and Yakult Ace Light

With the headquarters based in Shah Alam, Yakult (M) Sdn. Bhd. has its manufacturing facility in Seremban, Negeri Sembilan and sales branches in Alor Setar, Ipoh, Kuala Lumpur, Kota Bharu, Kuala Terengganu, Seremban, Melaka, Johor Bahru, Kuching, Bintulu and Kota Kinabalu.

Yakult HQ: Lot No 7, Jalan Jurangrang U1/21, Seksyen U1, Hicom Glenmarie Industrial Park, 40150 Shah Alam, Selangor Darul Ehsan

Yakult Factory: No. 276, Jalan Jarakun 1, Kawasan Industri Park, 70300 Seremban, Negeri Sembilan Darul Khusus
