Introduction

Based on the 2019 Poverty Line Income (PGK): Sabah ranks first as the poorest state in Malaysia with 19.6%, compared to 5.6% of the national poverty rate.

Sabah recorded the highest incidence of absolute poverty at 25.3% - more than a quarter of Sabahans live in absolute poverty.

Source: Household Income Estimates and Incidence of Poverty Report 2020 by Department of Statistics Malaysia

Five districts in Sabah recorded the highest poverty, 2019:

- 1. Tongod 56.6%
- 2. Pitas- 53.6 %
- 3. Kota Marudu- 46.1%
- 4. Beluran- 45.0%
- 5. Telupid 40.7%

*The three poorest districts in Malaysia are located in Sabah

Indicator	NHMS 2015 (%)	NHMS 2019 (%)	Sasaran NPANM III (%) (pada 2025)

Twigs & leaves:

4. Collaborate to continue growing and blooming.

Branches:

3. Assure actionable information and sources are accessible to project coordinators

Trunk:

2. Secure the commitment from vital stakeholders

Roots:

1. Provide the evidence to verify the magnitude of nutritional problems.

1. Provide the evidence to verify the magnitude of nutritional problems.

- Among <5 children in Sabah : 14.1% underweight, 21.2% stunting and 7.3% wasting (NHMS, 2016)
- Only 64% of the new cases receiving food basket in The Rehabilitation Programme Of Malnourished Children (PPKZM) have shown increment in body weight. (KPI PPKZM, 2021)
- 66% from hardcore poor, 29% from poor and 4% from B40.
- 87.5% of anemic antenatal mothers are from the hardcore poor, poor and B40 household who have limited ability to obtain foods high in iron, folic acid and vitamin C. (2021)

2. Secure the commitment from vital stakeholders

Appoint the Head of Family Nutrition Section in JKN Sabah as the state coordinator.

Prepare the document needed to gain official approval from the Director of Health at JKN.

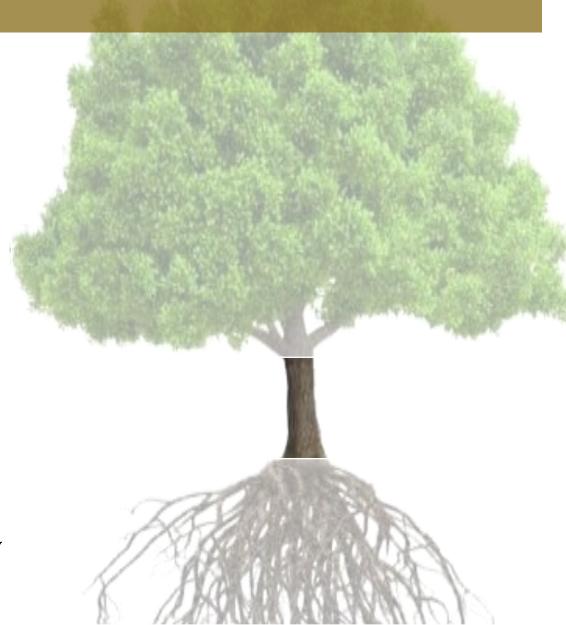

Formulate a strategic plan of action to execute the directive with the help of Deputy Director of Health.

Communicate the POA to all key personnel at district level i.e Health District Officer & District Nutritionist.

Initiate smart partnerships with other relevant gov agencies, NGOs & community leaders.

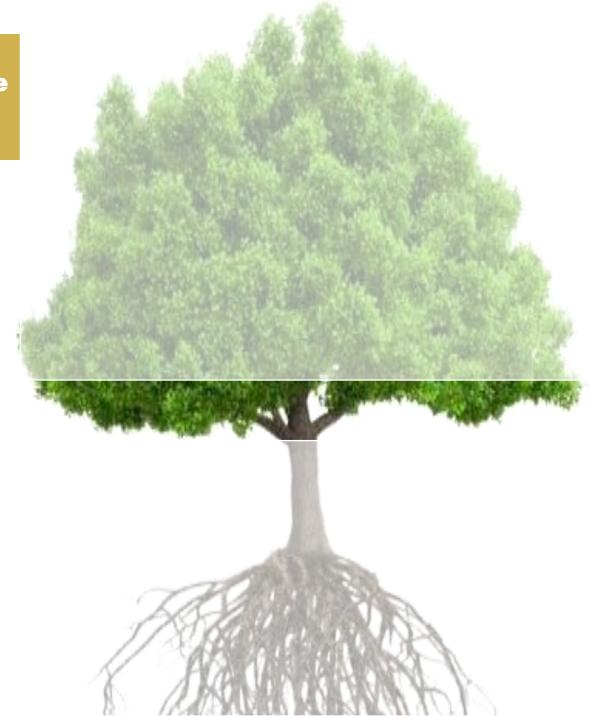

Visiting the potential edible garden project sites to assess the implementation issues.

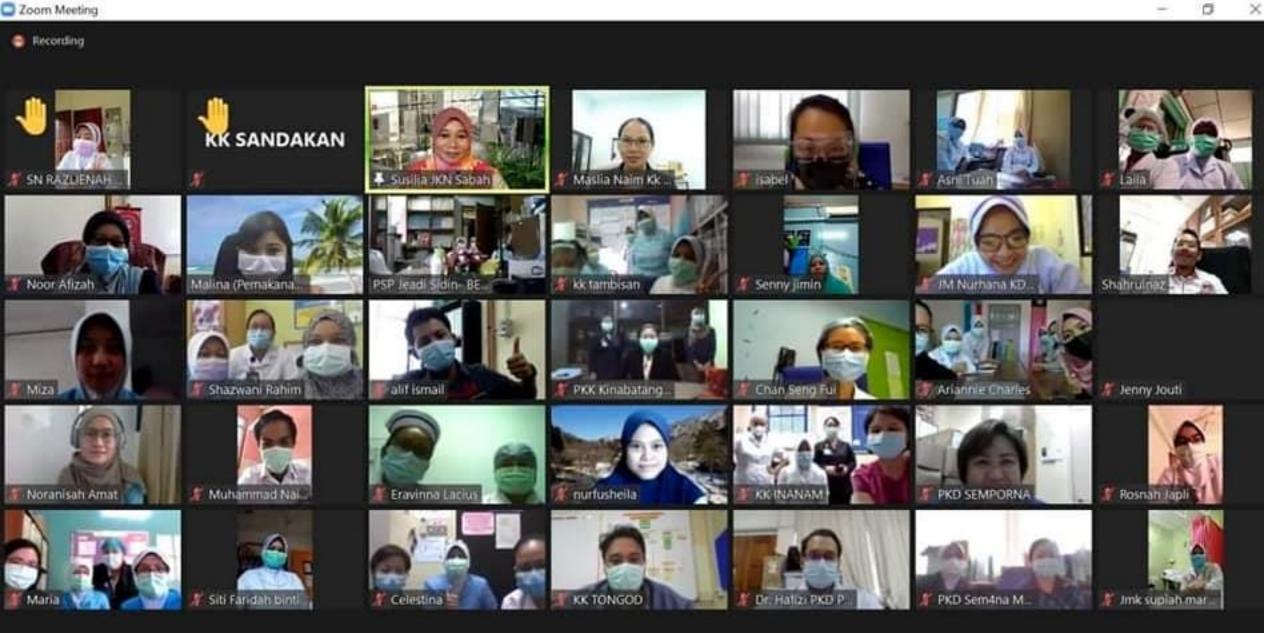

3. Assure actionable information and sources are accessible to project coordinators

Organize series of training: online @ in person @ hybrid.

STATE LEVEL ONLINE TRAINING FOR THE IMPLEMENTATION OF HYDROPONIC FARMING AT HOUSEHOLD SCALE ON JANUARY 27, 2021

FERTIGATION PRACTICAL SESSION FOR THE IMPLEMENTATION OF NUTRITION STRATEGIC ACTION PLAN IN SABAH STATE 2018-2025 AT LUYANG HEALTH CLINIC ON MARCH 3, 2021

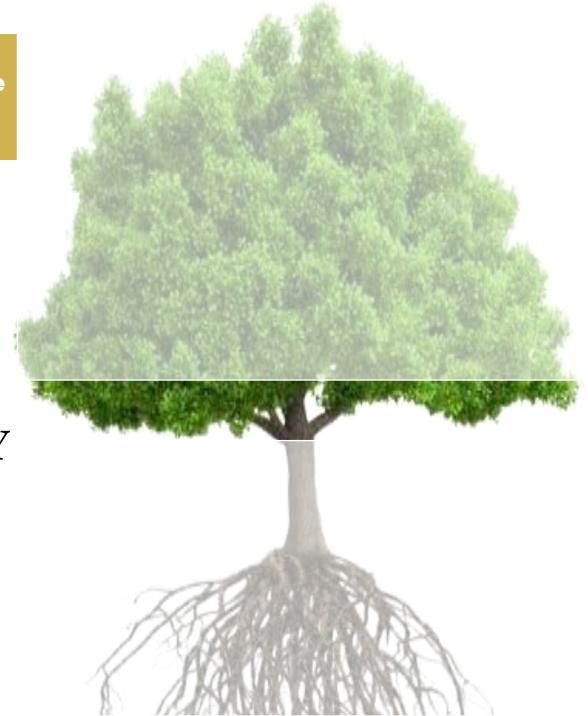

3. Assure actionable information and sources are accessible to project coordinators

Organize series of training : online @ in person @ hybrid.

Provide online reference & support as self-help guide to DIY sustainable garden.

Formulate the guidelines to implement the EGI state wide.

4. Collaborate to continue growing and blooming.

Coordinate state level EG competition

Edible Garden Initiative Competition by Sabah State Health Department

Edible Garden Competition

JABATAN KESIHATAN NEGERI SABAH

Actionable alternative to self-sustaining food production at household & community level.

Community Empowerment

#PertandinganEdibleGardenJKNSabah

Try to do it yourself, encourage others to try to do it together.

Learn one teach one.

Sustainable Food Availability

Help to diversify sources of food supply for households.

Focus on growing food sources of CHO, Protein, Vitamins & Fibers.

Environmentally Friendly

Use as many recycle / repurpose / upcycle materials as possible. Low cost, minimize waste, more harvest.

Innovation & Technology

Utilize techniques that can save the use of land, water, electricity, labour and other resources
I.e: self-watering pot, vertical garden, roof-top garden, floating garden, fertigation etc...

4. Collaborate to continue growing and blooming.

Coordinate state level EG competition

Execute smart partnerships with other relevant gov agencies, NGOs & community leaders.

4. Collaborate to continue growing and blooming.

Coordinate state level EG competition

Execute smart partnerships with other relevant gov agencies, NGOs & community leaders.

Advocate with UMS in evidence-based decision making to prioritize the initiative among underprivileged community

SMART PARTNERSHIP

Evidence-based, prioritized target group for community intervention

POSITIVE FEEDBACK FROM THE DISTRICT COORDINATOR

The sharing of sweet potatoes harvest from one of the children suffering from malnutrition.

Her mother took cuttings of sweet potatoes grown in the clinic to plant in her own garden. Her mother successfully planted sweet potatoes and got the harvest after 3 months.

Her mother was very happy and shared the sweet potato yield with the clinic staff.

It is a very rewarding feeling to see that the community has successfully planted and benefited from this edible garden project.

- JMK ROSLINE JARIP, KD BATU-BATU

Recommendations

More community garden please!

in Detroit. it feeds 2,000 households for free from this 1280 acres garden and a fruit orchard with 200 trees. They also supply food to local markets, restaurants, and food pantries. It also has a sensory garden for kids.

A **Grow Free** food sharing cart for residents to exchange food they have grown with each other for free. It has the simple rule, take what you need, give what you can.

Adelaide, Australia

Put a fitted crib sheet over the pack 'n play to keep the bugs and direct sunlight away from the baby. So smart!

Conventional **Fertigation** Hydroponic

is a wasted space.

Tubers Cereals

Vegies Fruits

Nuts

Minimize waste, maximize yields.
